

# GUILLAUME VACELET

## Looking for a frontend position in Seoul

I am a french IT engineer based in Bordeaux, France. Since my exchange year in 2022 at 중앙대학교 (Chung-Ang University), I am seeking opportunities to relocate in Seoul. I am specialized in web development, however I stay open to any opportunity to keep learning on exciting projects.

## EDUCATION

### IT MASTER 2

EPITECH

📅 2022 - 2023 📍 Paris, France

### IT MASTER 1 (exchange year)

Chung-Ang University

📅 2021 - 2022 📍 Seoul, South-Korea

### Entrepreneurship in AI Program

EPITECH & EMLyon business school

📅 2021 📍 Paris, France

### IT BACHELOR 3

EPITECH

📅 2018 - 2021 📍 Nantes, France

### Computer science & Mathematics Bachelor

University of Science & Technology

📅 2017 - 2018 📍 Tours, France

## EXPERIENCES

### Fullstack consultant

IPPON Technologies

📅 SEP 2023 - NOV 2024 📍 Bordeaux, France

Providing web development expertise: I adapt to my client's environment and system architecture, supporting both backend and frontend needs.

### CANAL+

#### 6 months consultant contract

Canal+ is one of the biggest french tv channel, as well as a large multimedia company. I worked with their french oversea territory branch, developing and maintaining their Angular 16 web application to oversee internet provider services. I helped to improve the architecture of the code, to develop new components, to convert some Flutter code to Angular, and to fix bugs.

### EVOLLIS

#### 6 months consultant contract

Evollis is a rental service provider, allowing users to rent products instead of buying them. They have partnership with Samsung, Fnac and other B2C businesses. I worked on their B2C website that is plugged on their partner's websites, using React, react-query and Spring/Java for the backend.

### Web fullstack developer internship

IPPON Technologies

📅 MAR 2023 - AUG 2024 📍 Bordeaux, France

Creation a web app for IPPON's office, with the goal of centralizing all collaborators resources and tools. I designed the UI/UX with Figma. The frontend was made with React and the backend with Spring/Java. I managed to let the web app accept custom plugins, allowing anyone to add new features. The app was then deployed with AWS.

### Web fullstack developer internship

ITEA

📅 AUG 2019 - DEC 2019 📍 Nantes, France

ITEA is the IT service provider of the "Gîtes de France", building websites for housing rental structure all over France. I developed VueJS map components using LeafletJS, for the B2C websites used by thousands of users to rent accomodations. I also maintained the B2B website used by the rental structures to manage their reservations, using PHP and SQL.
